

CHOOSE FLOORING WITH CAPABILITIES
AS LIMITLESS AS YOUR IMAGINATION.

[TERRAZZO]

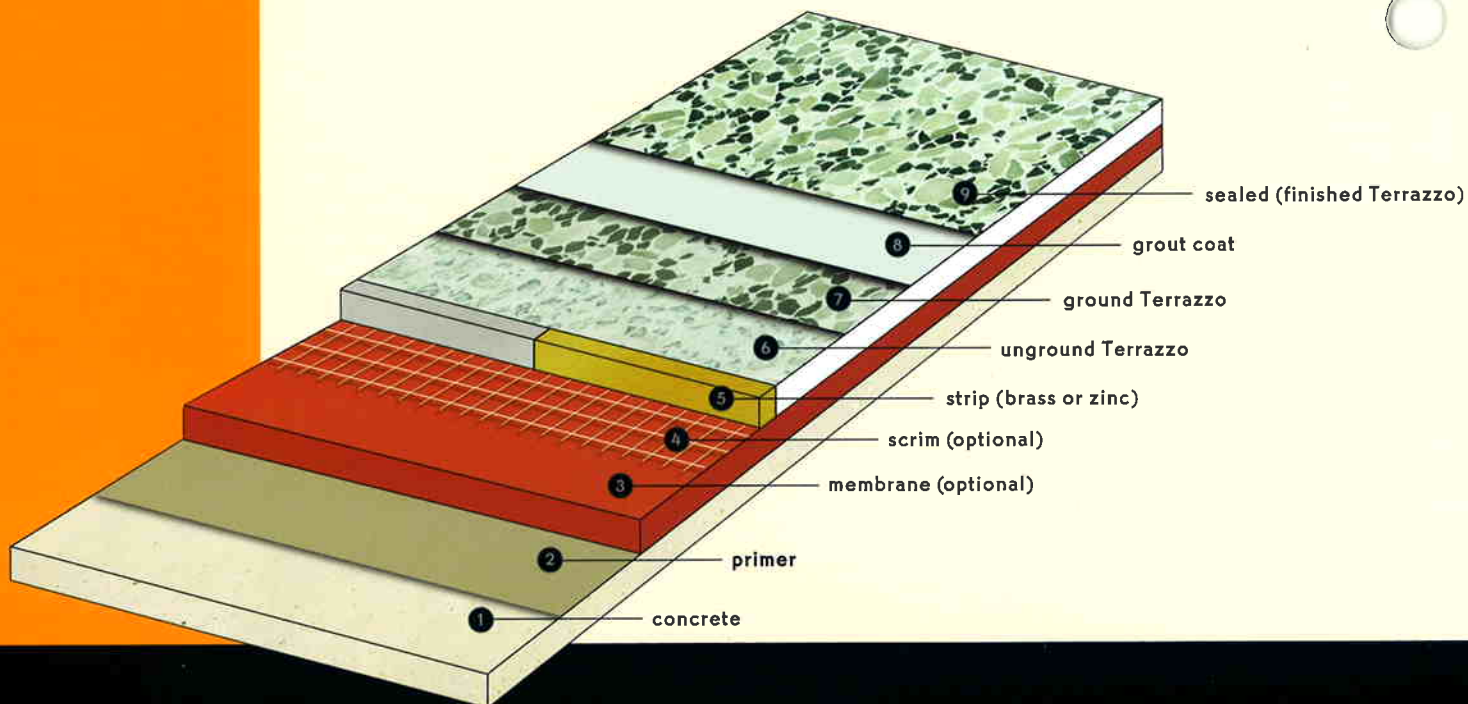

General Polymers[®]
High performance floor systems

We have everything you need
to bring your artistic vision to life.

Make an exciting entrance. A stunning hallway. An awe-inspiring arena. Anything is possible with Terrazzo from General Polymers.[®] With an unlimited color palette and endless pattern possibilities, we can create anything you envision.

But the great looks you'll get are only the beginning. Terrazzo is an easy-to-use flooring product designed to give you a beautiful, durable finish. It's ideal for high-traffic areas such as schools, airports, hotels, hospitals, pharmaceutical facilities, convention centers, and government buildings. And our knowledgeable flooring experts will provide you with the products and the support you need to achieve your aesthetic goals and satisfy your customers.

Meet your project's specifications. And exceed everyone's expectations.

Terrazzo is more than just a pretty face. Its zero-VOC and low odor properties make it suitable for "green" building projects. And when it comes to durability, this product has no equal. A seamless construction makes hard-to-clean grout lines and chipped edges a thing of the past. The strong epoxy matrix prevents wear and tear. And Terrazzo's stalwart resistance to stains, chemicals, and scuffing means it can stand up to the toughest conditions.

In the past, premium hard surfaces had a tendency to crack. This significant problem is a memory now, thanks to Sherwin-Williams' state-of-the-art crack suppression system. And that's just one of our many innovations to protect your floor. Which means you can count on us for all the products you need to prevent cracking and provide waterproofing.

Terrazzo is durable, easy to clean, and will not support microbial growth. This adds up to low life-cycle costs. And with its infinite style possibilities, you can specify Terrazzo with absolute confidence that your expectations will be met.

Not all Terrazzo is created equal.

With the development of technologies like the crack bridging membrane and moisture control systems, we're setting the bar for innovation in the decorative flooring industry. So you can count on us for the primers, the membranes, and the colors you need to get the job done right.

At Sherwin-Williams, we're recognized nationwide for our outstanding customer service and support. And behind every product we make stands our experienced flooring experts. We'll work with you to meet building regulations, answer your questions, and recommend the best product solutions to you. We're dedicated to help make your aesthetic vision a reality.
